Online Trading Masterclass Alpha Bull Traders 2019-08-19 Most financial trading books read more like an infomercial than a book - this is different Would you jump out of an airplane without a parachute? Then why would you start making trades online before you learned what you were doing? It's crazy! But with deep discount brokers making it look so easy for individual investors, it's no wonder consumers today are lured into a false sense of security. You can't rely on outdated textbooks and strategies anymore. But if you adapt, you can make a considerable fortune with these new market conditions. Here's just a fraction of what you'll discover inside: The best brokerage accounts for swing traders (setting this up right can save you \$1000+ a year in commissions) How social media moves asset prices, and how to always be first to act on these (do this and you'll almost always ensure lower entry prices than your competition) The only 3 strategies you need for swing trading success (despite what everyone else tells you, it's these 3 which will bring 90% of your profits) How to always ensure the right entry position for a trade How to spot under or overvalued stocks with 99% accuracy The "magic trading number": If you win this percentage of your trades, you'll make massive profits (lower than you think) The secret to finding your trading edge (hint: the risk-reward ratio isn't enough) When to invest, and more important when NOT to invest like Warren Buffett The 10 best traders to follow on Twitter for maximum profit opportunities The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons you can learn from the DOTCOM bubble Why a new trader should never trade cryptocurrency How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy "Hedge-Fund Style" money management for absolute beginners How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) A simple technique you can do in just 5 minutes a day. This is used by top hedge fund traders, and almost always guarantees an increase in your percentage of winning trades A "backdoor" technique which lets the market do the work for you (an effective "passive trading" strategy and used by Wall Street all the time)...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) All written in plain, easy to understand English. Guide to Reliable Internet Services and Applications Charles R. Kalmanek 2010-06-09 An oft-repeated adage among telecommunication providers goes, "There are ve things that matter: reliability, reliability, reliability, time to market, and cost. If you can't do all ve, at least do the rst three." Yet, designing and operating reliable networks and services is a Herculean task. Building truly reliable components is unacceptably expensive, forcing us to c-struct reliable systems out of unreliable components. The resulting systems are inherently complex, consisting of many different kinds of components running a variety of different protocols that interact in subtle ways. Inter-networkssuch as the Internet span multiple regions of administrative control, from campus and core networks to Internet Service Providers, making good end-to-end performance a shared responsibility borne by sometimes uncooperative parties. Moreover, these networks consist not only of routers, but also lower-layer devices such as optical switches and higher-layer components such as rewall and proxies. And, these components are highly configurable, leaving ample room for operator error and buggy software. As if that were not difficult enough, end users understandably care about the performance of their higher-level applications, which has a complicated relationship with the behavior of the underlying network. Despite these challenges, researchers and practitioners alike have made tremendous strides in improving the reliability of modern networks and services.

Begin met het waarom Simon Sinek 2012-03-08 Simon Sinek laat in 'Begin met het Waarom' zien dat organisaties en leiders die zich richten op het waarom van hun bedrijf succesvoller, invloedrijker en innovatiever zijn. Leiderschapsstijlen kunnen verschillen, maar alle grote, inspirerende leiders hebben één ding met elkaar gemeen: ze weten dondersgoed waarom ze doen wat ze doen. Toch sneeuwt bij veel bedrijven het waarom nogal eens onder in de hectiek van de dag. 'Begin met het waarom' helpt je om het waarom weer centraal te stellen en zo beter en authentieker leiding te geven en je omgeving te inspireren. Met vele voorbeelden uit de praktijk toont Sinek aan dat het werkt. Dit boek is gebaseerd op de ideeën uit zijn TEDX-talk over leiderschap, waarmee

hij wereldwijd de aandacht trok.

Waarom we altijd tijd te kort komen Dan Ariely 2010-04-28 Wanneer je mensen herinnert aan de tien geboden, zijn ze minder snel geneigd te liegen, ook als het atheïsten zijn. Een aspirientje van een duur merk helpt beter tegen hoofdpijn dan een goedkoop eigen merk, zelfs al zijn de pilletjes identiek. Als we ertgens op kunnen rekenen, dan is het wel op de irrationaliteit van menselijk gedrag. En dus maakt het niet uit hoeveel voorlichting een overheid geeft over de gevaren van onbeschermd seks: zodra de opwinding toeslaat, wordt het gezonde verstand overboord gekieperd, zoals Ariely met een amusant experiment laat zien. Waarom we altijd tijd te kort komen toont met verrassende voorbeelden en onderzoeken aan hoe slecht we in staat zijn de juiste beslissingen te nemen en hoe we met dat besef ons voordeel kunnen doen. Net als Malcolm Gladwell slaagt Ariely erin om de nieuwste inzichten over menselijk gedrag voor iedereen bruikbaar te maken **Smart Homes and Health Telematics, Designing a Better Future: Urban Assisted Living** Mounir Mokhtari 2018-07-05 This book constitutes the proceedings of the 16th International Conference on Smart Homes and Health Telematics, ICOST 2018, held in Singapore, Singapore, in July 2018. The theme of this year volume is "Designing a better Future: Urban Assisted Living", focusing on quality of life of dependent people not only in their homes, but also in outdoor living environment to improve mobility and social interaction in the city.
